

## CORGHI OPENS THE NEW USA BRANCH

Starting on 16<sup>th</sup> May  
2009 a help desk offers  
assistance via a free  
phone number  
**1-800-260-0968**

## A NEW FACTORY

A new, cutting edge  
technology production  
unit for a higher quality  
product and a quicker  
response to customer  
demands.

## A NEW PLANT

**WORK IS NEARING  
COMPLETION ON  
THE PRATO DI  
CORREGGIO PLANT,  
ABOUT 10 KM FROM  
CORGHI'S HISTORICAL  
HEADQUARTERS.**

This new production facility is intended to internalise a number of production processes such as cutting, bending, welding and painting, while also introducing a greater degree of automation. The cutting edge technology of the machinery used places this Corghi production facility among the most advanced at European level for this type of work. Designed to operate in complete safety and in total respect for the environment, the new plant boasts a floor space of 20.000 m<sup>2</sup>. Internalising the production processes mentioned above will bring a number of advantages, including higher quality, as increased automation ensures more precise and constant results, and a shorter time to market, due to reduced process times.

**Another good reason to...  
follow Corghi!**

## CORGHI IN THE USA

**ON 16<sup>TH</sup> MAY 2009,  
CORGHI HAS OPENED  
A NEW BRANCH FOR THE  
NORTH AMERICAN MARKET  
IN HAMILTON (OHIO).**

The North American market has historically been one of Corghi's most important business areas. The brand is the leading name in the tyre changing sector in this market, where it also commercialises a number of other ranges of wheel service products. This new facility will allow the company to offer all of its North American clients a comprehensive pre- and aftersales service and supply replacement parts directly. This physical presence in the market will also ensure constant contact with the end user, enabling the company to better understand their needs and develop made to measure products and services for American customers to achieve the goal of total satisfaction.

## 23<sup>RD</sup> INTERNATIONAL EXHIBITION OF EQUIPMENT AND PRODUCTS FOR THE AUTOMOTIVE INDUSTRY

20 - 24 May 09

Bologna Trade Fair District

VIA MASERATI

NORTH ENTRANCE

**PAVILION: 19**

**STAND: A2-A6-C2-C6**

**SYNCHRONIZED  
MOVEMENT  
AXIAL  
RIM  
TOOL**

Committed to constant research for innovative solutions to meet the demands of an increasingly discerning market, Corghi will be present at Autopromotec with a wide range of new products to meet all requirements.

### THE NEWEST ADDITIONS TO THE BRAND'S RANGE OF TYRE CHANGERS ARE THE MONSTER AGTT AND ARTIGLIO 500.

The new Corghi **Monster AGTT** is the latest tyre changer for commercial vehicles and also features "**Leva la Leva**" technology invented by Corghi in 2001.

With a highly automated demounting tool and bead breaker disc, the Corghi Monster substantially reduces operator effort. This new model also ensures absolute precision, with a tool head that remains constantly centred on the wheel and perpendicular to the tyre. **Corghi Monster is capable of working with rim sizes of up to 58"** without extensions and has a clamp mechanism for

centre holes up to 90 mm in diameter. The machine also has a self-supporting frame ensuring excellent ergonomics as there are no obstacles to hinder operator movements.

**ARTIGLIO 500** is the new tyre changer for cars with which Corghi wishes to make Artiglio 50 even more successful, improving it with all the feedback from the market resulting in an even higher performance product.

The advantages of the new machine include the "**Leva la Leva**" system, patented by Corghi in 2001 with the Artiglio Master, and a capability of **working with rim sizes from 12" to 32"**.

## CAL ONE-TOUCH

steering wheel rotation  
sensor calibration system  
integrated in the wheel  
aligner.

Essential for correctly aligning  
wheels on cars equipped with  
ESP, adaptive suspensions, dy-  
namic steering, electric power  
assisted steering and adaptive  
lighting systems.

For the wheel balancer segment, Corghi presents **BLUE LIGHT**, a new and highly sophisticated wheel balancing technology developed in response to the needs of the upper-end segment of the market. This high-tech system is also extremely user-friendly thanks to the **Touchscreen, Real Time, Blue Light and Touchless technologies.**

Adding to the wheel alignment range is the new **BLACK TECH X SERIES**, the latest generation of Corghi's Black Tech family featuring optimised performance and ergonomics and offering the ideal answer to the needs of the wheel alignment professional.

Corghi has also presented the **EM7270**, a microprocessor operated electronic wheel balancer for car wheels, ideal for workshops and service stations. Based on the EM7240, the EM7270 is the new electronic wheel balancer with monitor which will be presented at Autopromotec 2009.

**EVEN IN THE PRESENT  
MARKET SCENARIO  
CORGI STILL LOOKS TO  
THE FUTURE WITH OPTIMI-  
SM AND INVITES ALL WHEEL  
SERVICE PROFESSIONALS TO  
FOLLOW ITS EXAMPLE.  
SO IT'S TIME TO...**

## NEW TYPE APPROVALS

Corghi is yet again the first class partner also for the major and most prestigious car manufacturers.

From this viewpoint, world level type-approval has recently been awarded to a series of products, including:

- Blue Light, the top of the Corghi wheel balancer range, for the **BMW** and **Volkswagen networks**
  - The new EM74 and EM72 range of wheel balancers for all brands of the **VW Group**
  - The Erco 301 TY lift, specifically for the new **Toyota IQ city car**
- In addition, the collaboration agreements with **Ferrari** and **Maserati** have been renewed, confirming Corghi as the sole supplier for the entire range of wheel service machines used by the workshops of these prestigious brands.
